

9. SCIN-Newsletter

Dear colleagues,

With this 9th issue of our newsletter we would like to inform you again about the current status of our joint project "**SCIN** - Survey on **C**urrently applied **I**nterventions in **N**eonatal resuscitation" and pass on important information to you.

Recruitment

In recent months we have been able to recruit more international clinics, including the first clinics from the UK, Greece and Japan. This means that 65 clinics are now participating in the survey.

The recruitment phase ends at the end of March 2023 - all interested and not yet participating clinics that have not confirmed their participation by 31.03.2023 can no longer be considered.

If you have not yet confirmed your participation or can refer interested clinics in your area, please contact us at neo-survey@ukdd.de.

	Germany	International
Participation	32	28
Interest	7	8

Survey

In total, over 46,800 children have now been born in the participating clinics during the survey period. Of these births, a total of **5706 newborns with interventions are recorded in our database**. However, due to the change of year, some of the returns for November and December are still outstanding.

We thank you for your continued commitment and look forward to receiving the outstanding data!

Important Updates

14th Dresden Symposium ESPR Spring School – From **9th to 11th of March 2023** the **14th Dresden Symposium/ESPR Spring School** will take place in **Dresden, Germany**. We kindly invite all SCIN participants to take part in this meeting either live or online – a special session for discussing SCIN and possible cooperations in the future is planned!

Further information and registration details can be found at www.ukdd.de/fetoneosymposium.
